EDUCATION

GEORGE MASON UNIVERSITY

B.S. Networking & Telecommunications

TECHNICAL SKILLS

FRONTEND

React | TypeScript | Redux | CSS3

HTML5 | Angular | GraphQL

Sass/LESS | Styled Components

BACKEND

Node | Kotlin | Go | Python

PostgreSQL | MySQL

DATA & VISUALIZATION

D3 | Anychart | Tableau | Looker

TOOLS & PLATFORMS

Git | Docker | Jenkins

LaunchDarkly | Webpack

CONCEPTS

Distributed Systems

Frontend Architecture

Design Systems

Performance Optimizations

CI/CD | Microservices

AI/TOOLING

Cursor | ChatGPT | Claude

Gemini | Rovo (Atlassian’s AI)

SUMMARY

I specialize in building high-performance, user-facing systems at scale. My experience spans collaborative design tools, data-heavy analytics platforms, and enterprise SaaS infrastructure. I have a proven ability to design and ship platform-level features across large product ecosystems, including systems supporting millions of users and delivering measurable business impact (\$600K+ annual cost savings).

PROFESSIONAL EXPERIENCE

ATLASSIAN

Senior Software Engineer | DEC 2022 - MAR 2026, Remote

- Led architectural design and implementation of a global cookie consent / compliance platform (GDPR, CPRA) deployed across Atlassian’s product suite, supporting millions of users and high-throughput traffic (~100k+ RPS class)
- Built frontend-integrated platform infrastructure ensuring low-latency execution on every page load across diverse product environments
- Drove cross-team adoption across multiple product groups, aligning integration patterns, performance constraints, and rollout strategy
- Reduced infrastructure costs by ~\$600K annually through system optimization
- Contributed to enterprise posture management tooling, enabling services to meet enterprise-grade compliance standards
- Operated in a highly ambiguous environment, owning technical direction, prioritization, and delivery without dedicated PM/design support
- Leveraged AI-assisted development tools (Cursor + ChatGPT/Claude/Gemini) across frontend and backend workflows, improving iteration speed and reducing context switching

INVISION

Lead Software Engineer | APR 2021 - DEC 2022, Remote

- Built features for Freehand, a real-time collaborative white boarding application, developing complex multi-user interactive UI systems
- Contributed to browser-based rendering and frontend architecture for highly dynamic, stateful applications
- Developed rapid prototyping workflows enabling designers to quickly create, share, and iterate on product concepts
- Implemented integrations with Figma and Adobe XD to improve cross-platform workflows and user retention
- Collaborated with product and design to deliver high-quality UX in a fast-paced startup environment

PIXABILITY

Principal Software Engineer / Technical Lead | MAR 2016 - APR 2021, Remote

- Led a team of 2 engineers to redesign a large-scale analytics platform, migrating from Angular to React
- Owned technical roadmap, system design, and delivery planning across multiple quarters
- Built data visualization systems (D3, Highcharts) for real-time ad campaign analytics
- Developed UI features for platforms optimizing YouTube ad spend across large datasets
- Collaborated with data science teams to deliver ML-driven dashboards and actionable insights
- Integrated with BI tools (Tableau, Looker) to support reporting workflows
- Promoted from Senior Engineer → Principal/Technical Lead, expanding scope in architecture and team leadership

PROJECTOR PSA

Senior Software Engineer | OCT 2014 - MAR 2016

- Built data-intensive web applications for B2B financial clients
- Developed advanced UI systems including configurable data grids with nested hierarchies and real-time data flows
- Implemented client-side caching (IndexedDB) to improve performance and reduce server load
- Led code reviews and mentored junior engineers

LumiraDX (Formerly AlereACS)

Frontend Engineer II | OCT 2013 - OCT 2014

- Developed features for a single-page healthcare application used by thousands of international users

VIRTUSA

Software Engineer | OCT 2012 - SEP 2013

- Built web applications using Java, JSP, and frontend technologies
